

Electronic Security Systems

Program Manager 256-895-2552

U.S. ARMY CORPS OF ENGINEERS

BUILDING STRONG®

The U.S. Army Engineering and Support Center, Huntsville's Electronic Security Center (ESC) provides quality oversight and technical expertise for the design, procurement and installation of Electronic Security Systems (ESS).

The center offers cradle-to-grave ESS technical services and, when requested, will survey, design, procure, install, test and maintain systems worldwide. Any U.S. government agency in need of physical and/or electronic security systems should contact the ESC to discuss individual requirements and available engineering technical support and contracting opportunities.

The ESC team works with customers and in-house contracting teammates to develop requirements and issue a Request for Proposal (RFP), resulting in a task order award to a pre-qualified contractor offering the best value to the government.

The ESC also delivers ESS Design Courses, Integrated Commercial Intrusion Detection System (ICIDS) operator and system administration courses, ESS site survey training and acceptance testing courses for the Army and other U.S. government agencies.

Army Regulation 190-13 and Engineer Regulation 1110-1-8162 distinguish the ESC as the mandatory center of expertise for electronic security system (ESS-MCX) technical expertise for Army organizations. The ESS-MCX and procurement and installation teams rapidly deliver products and services to U.S. government agencies or affiliates worldwide.

Huntsville Center's Electronic Security Center provides worldwide support for military programs and civil works.

Services Offered

Design and Design Reviews	Procurements and Installation	ICIDS Training
Technical Consultation and Support	Criteria and Specification Development	Technology Transfer
System and Vulnerability Assessments	ESS Design Courses	ESS Acceptance Testing and Training
Security Surveys	Special Studies	Life Cycle Maintenance and Service
ESS Site Survey Training	Master Planning
