

Initial Outfitting and Transition

Program Manager 256-895-2508

U.S. ARMY CORPS OF ENGINEERS

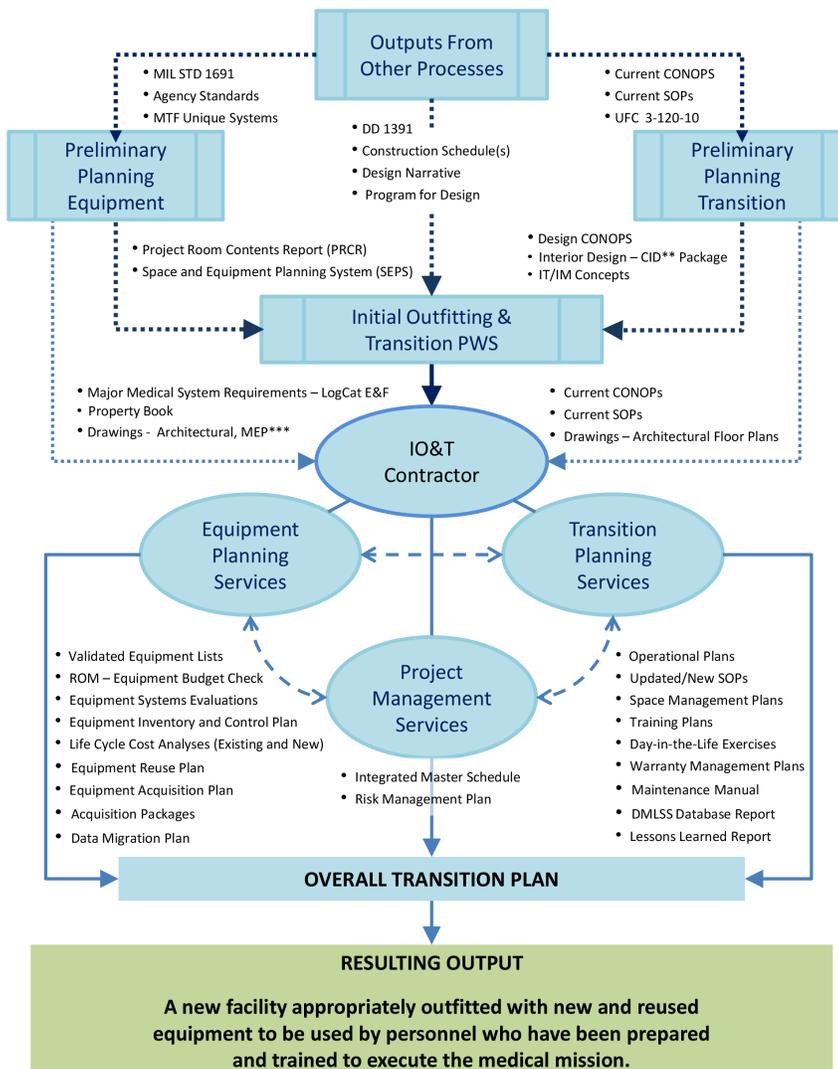

BUILDING STRONG®

The Initial Outfitting and Transition (IO&T) Program at the U.S. Army Engineering and Support Center, Huntsville offers total turn-key project support for the equipping and transitioning of staff and patients associated with new and renovated military healthcare and medical research laboratory facility construction projects to support the medical mission throughout the world.

The IO&T Program provides transition support with services that can provide everything that is needed to meet the mission on first patient day — the equipment and, just as important, the complete clinical operation planning to ensure smooth processes to support the patient delivery model in a world-class facility for the warfighters and their families.

Equipment Planning, Transition Planning, and Project Management Process & Relationships

Process drives the contractor into a continuous refinement of information that evolves into a final overall transition plan resulting in the complete outfitting and transition of a facility

Project Management Services are integral to the execution of any tasks ensuring effective, efficient and timely completion of contracted services. Services include the development of an Integrated Master Schedule to coordinate the IO&T schedule with other major schedules such as construction to ensure timely execution that mitigate risks associated with the schedules.

Equipment Planning Services to validate the final composition of equipment — percentage of reuse and percentage of new — with an associated rough order of magnitude costs and the development of acquisition packages for all new identified requirements to support complete outfitting including DMLSS support.

Transition Planning and Relocation Services for the reorganization and consolidation of existing facilities and/or the opening of new facilities to ensure efficient transition of functions to new locations including day-in-the-life training exercises.

Distribution A - Approved for Public Release - Unlimited Distribution - July 2016

The Initial Outfitting and Transition (IO&T) Program at the U.S. Army Engineering and Support Center, Huntsville offers total turn-key project support for the equipping and the transitioning of staff and patients associated with new military healthcare and medical research laboratory facility construction and renovation projects like these associated with the Soldier Centered Medical Home efforts.

Furniture, Fixtures and Equipment (FF&E) Interior Design Services in compliance with UFC 3-120-10 Interior Design ensuring incorporation of evidence-based healthcare concepts to complement any Structural Interior Design (SID) packages developed as part of design and construction.

Equipment Purchasing Services for all identified medical, research and non-medical equipment, including limited IM/IT systems, physical security systems; specialty telecom systems as well as other identified equipment/systems necessary to meet functional requirements of the facility.

Final Turnover and Close-out Services to provide all management, materials, tools, supervision, labor and equipment to facilitate the final turnover of the facility, applicable documents and close-out of identified projects.

Installation, Testing and Training Services to provide for the installation, assembly, technical inspection, testing and training for all identified equipment (existing and/or new) and systems including development of warranty plans to include existing warranties still in effect.

Warehousing Management Services to provide temporary and long-term warehousing, including all associated logistical services as required to support the IO&T effort.

Post Occupancy Evaluation (POE) Services provide the facilitation of a full POE for identified projects or for participation in POE activities as needed by the client.

Contracts

Huntsville Center awarded a four-year Indefinite Delivery/Indefinite Quantity Multiple Award Task Order Contract (IDIQ MATOC) with a pool of nine firms (five large businesses and four small businesses) for supporting and executing the IO&T Program March 1, 2016. The IDIQ MATOC has a capacity of \$495 million and can support all Department of Defense services as a part of the shared services associated with the Defense Health Agency.
