

Bivouac Area

General

The Bivouac Area provides a place on the range where troop can stay during an extended gunnery.

Primary Features

Typically, the Bivouac area provides pads for six GP-Medium tents. Each tent pad has a 15' by 25' concrete slab with embedded posts and GFCI receptacles. Provide 10' spacing between pads. Provide red and white area lighting switchable from the control tower.

Siting

The Bivouac Area should be near, but upwind from, the latrines and close to mess areas. It should be within walking distance from the unit staging and mess areas, but away traffic areas for air and ground vehicles.

Lightning Protection

Provide lightning protection as required by the installation.
