Communications Infrastructure and Systems Support (CIS²)

Program Manager 256-895-5503

U.S. ARMY CORPS OF ENGINEERS

BUILDING STRONG ®

The U.S. Army Engineering and Support Center, Huntsville's Communications Infrastructure and Systems Support (CIS2) team provides quality oversight and technical engineering solutions for facility related communications distribution systems.

Our Team: The CIS2 Program utilizes a dedicated, multidiscipline Project Delivery Team (PDT) to provide support for the survey, design, acquisition, installation, testing, and/or maintenance of facility communications distribution systems. Furthermore, the PDT includes subject matter experts in the areas of Project Management, Information Assurance/Cyber Security, Engineering, Contracting, Resource Management, and Legal Counsel. Along with a cadre of Huntsville Center employees, the program also partners with other USACE Divisions and Districts to ensure proper integration of mobile and non-mobile communications distribution systems into facility design, installation, and/or maintenance.

Program Scope: In accordance with the Unified Facilities Criteria (UFC) standards and Telecommunications Distribution methods, the scope of work performed by the team includes telecommunications interior infrastructure planning and design, facility-related cybersecurity systems; telecommunications spaces, pathways, cabling and systems and interconnecting components necessary to support the infrastructure of voice, data and video systems.

In today's environment, facility communications distribution
systems integration is a non-severable aspect to a complete and usable facility.

Key Customers Include:

- U.S. Army Reserve Command
- U.S. Southern Command
- DoD Education Activity
- Office of the Secretary of Defense
- Yuma Proving Ground Network Enterprise Center
- Joint Communication Support Element

- 88th Regional Support Command
- Fort Bliss Directorate of Public Works
- National Guard Bureau
- Navy Systems Support Group
- Washington Headquarters Agency

Contact CIS2 for your program and project management services
in the facility communications distribution systems areas.
