

# Facility Technology Integration - General (FTI-Gen)

Program Manager 256-895-1844

**U.S. ARMY CORPS OF ENGINEERS**

**BUILDING STRONG®**

The U.S. Army Engineering and Support Center, Huntsville's (CEHNC) Facility Technology Integration - General (FTI-Gen) Program provides quality oversight and technical engineering solutions for facility related communications distribution systems.

**Our Team:** The FTI-Gen Program utilizes a dedicated, multi-discipline Project Delivery Team (PDT) to provide support for the survey, design, acquisition, installation, testing and/or maintenance of facility communications distribution systems. Furthermore, the PDT includes subject matter experts in the areas of Project Management, Information Assurance/Cyber Security, Engineering, Contracting, Resource Management and Legal Counsel. Along with a cadre of CEHNC employees, the program also partners with other U.S. Army Corps of Engineers (USACE) Divisions and Districts to ensure proper integration of mobile and non-mobile communications distribution systems into facility design, installation and/or maintenance.

**Program Scope:** In accordance with the Unified Facilities Criteria (UFC) standards and Telecommunications Distribution methods, the scope of work performed by the team includes telecommunications interior infrastructure planning and design; facility-related cybersecurity systems; telecommunications spaces, pathways, cabling and systems; mass notification systems; uninterrupted power supply systems; and interconnecting components necessary to support the infrastructure of voice, data and video systems. Data center preventive and corrective maintenance. Modernization of Secure Internet Protocol Router (SIPR) and Non-Secure Internet Protocol Router (NIPR) networks, as well as telephone from analog to Voice over Internet Protocol (VoIP). We also provide helpdesk/administrative support services for various organizations.

*In today's environment, facility communications distribution systems integration is a non-severable aspect to a complete and usable facility.*

## Key Customers Include:

- Office of the Secretary of Defense
- U.S. Army Reserve Command
- U.S. Southern Command
- DoD Education Activity
- Yuma Proving Ground Network Enterprise Center
- Joint Communication Support Element
- 81st Army Readiness Division
- 88th Regional Support Command
- National Guard Bureau
- Navy Systems Support Group
- Washington Headquarters Agency
- Defense Intelligence Agency
- U.S. Marine Corps - Camp Pendleton
- U.S. Marine Corps Forces Reserve
- National Defense University
- Program Executive Office Enterprise Information Systems

**Contact FTI-Gen for your program and project management services in the facility communications distribution systems areas.**
